Which of the following is used to search for specific data in a table in Microsoft Access?

a)Report

b) Form

c) Query

d) Table Design View

Answer: c) Query

In one-to-many relationship the table in ‘one’ side is called _____ and on ‘many’ side is called _____

a. Child , Parent

b. Parent , Child

c. Brother , Sister

d. Father, Son

Answer: B) Parent , Child

To create relationship between two tables

a. drag the primary key of a table into foreign key of another table

b. drag the foreign key of a table into the primary key of another table

c. drag any field from parent table and drop on child table

d. Any of above can be done to create relationship

Answer: c) drag any field from parent table and drop on child table

The size of Yes No field is always

a. 1 bit

b. 1 byte

c. 1 character

d. 1 GB

Answer: A) 1 bit

What is the purpose of a foreign key in Access?

a. To establish a relationship between two tables

b. To sort records in a table

c. To uniquely identify each record in a table

d. To delete records from a table

Answer: a. To establish a relationship between two tables

The purpose of a foreign key in Microsoft Access is **to establish and maintain a link between data in two tables**. This helps to control the data that can be stored in the foreign key table.

Here are some other benefits of using foreign keys:

Avoids duplicate data

Foreign keys allow you to avoid storing the same data repeatedly. For example, you can use a foreign key to reference a user's unique row in the users table to get their name and other information.

Prevents erroneous data

Foreign key constraints prevent actions that could damage the links between tables and add erroneous data to the foreign key column.

Establishes consistent relationships

Foreign keys help to establish and enforce consistent relationships within data.

Which Access object is used to create a query that prompts the user to enter criteria at runtime?

a. Form

b. Table

c. Parameter query

d. Report

Answer: c. Parameter query

A parameter query in Microsoft Access is a query that asks for criteria when run, allowing users to reuse the same query without having to edit the criteria each time. Parameter queries are useful when the same query needs to be repeated with different criteria.

Here are some things to know about parameter queries:

How to create a parameter query

Create a query, locate the fields where the variable criteria will appear, type the phrase to appear in the prompt, and then run the query.

What types of queries can have parameters

Parameters can be added to select, crosstab, append, make-table, and update queries.

How parameters are displayed

For each parameter, a separate dialog box will appear to prompt the user for a value.

Which Access view is used to enter and edit data in a table?

a. Datasheet view

b. Design view

c. PivotTable view

d. Report view

Answer: a. Datasheet view

What is the purpose of a validation rule in Access?

a. To restrict data entry based on specified criteria

b. To sort records in a table

c. To delete records from a table

d. To display data in a table

Answer: A

Which Access object is used to create a report that summarizes data in a table or query?

a. Form

b. Table

c. Query

d. Report

Answer: d. Report

The arranging of data in a logical sequence is called

A. Sorting

B. Classifying

C. Reproducing

D. Summarizing

Answer: Option A

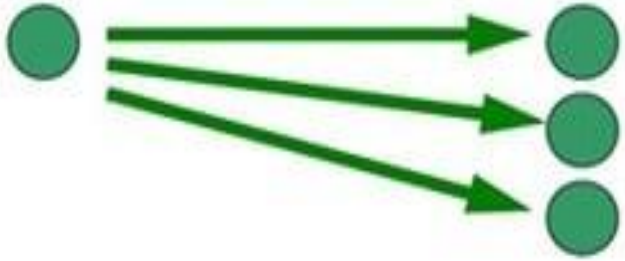
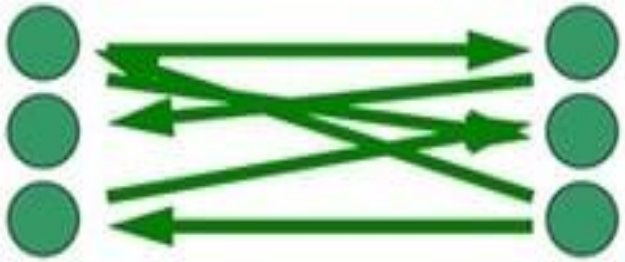
Understanding Relationships in Access databases

One to one relationships connect one entity to one other entity:

One to many relationships connect one entity to one or more other entities:



Many to many relationships connect many entities to many other entities:



48. Wat he purpose of the description column in table design view?

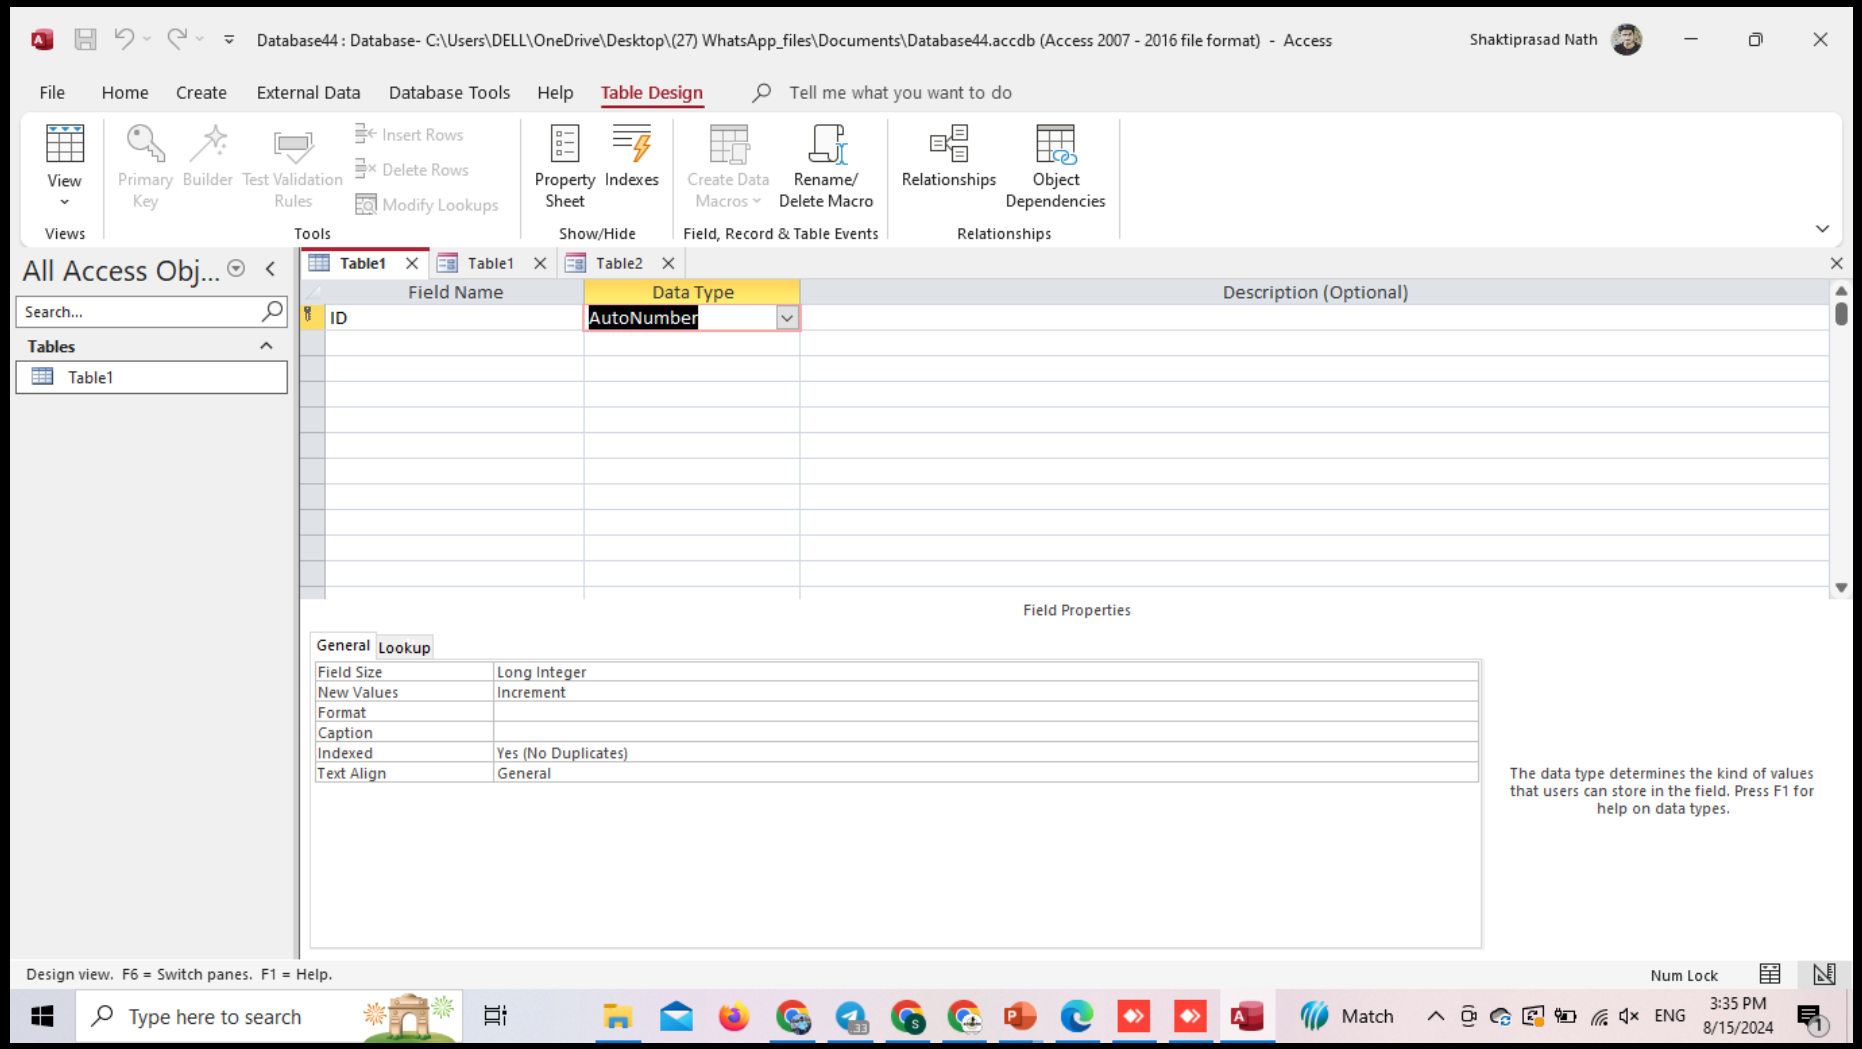
A. To define the data type applied to each field within the table

B. To describe the data that should be entered in each field

C. To enter lookup data that the field should refer to.

D. None of the above

Answer: Option B



Which field type can store photos?

A. Hyperlink

B. OLE

C. Both of these can be used

D. Access tables can't store photos

Answer: Option B

If you are creating a cross-tab query, what must table you are querying contain?

A. Lots of confusing information

B. More than 100 records

C. At least one field

D. None of the above

Which of the following is NOT a valid data type in MS Access?**

A) Text

B) Number

C) Date/Time

D) Graphic

Answer**: D) Graphic

In MS Access, what is a table?**

A) A collection of data organized in rows and columns

B) A set of commands

C) A collection of formulas

D) A place to design reports

Answer**: A) A collection of data organized in rows and columns

What is the purpose of a primary key in MS Access?**

A) To allow multiple keys

B) To uniquely identify each record in a table

C) To link tables together

D) To sort data in descending order

Answer**: B) To uniquely identify each record in a table

Which object in MS Access is used to retrieve specific data by applying a filter?**

A) Form

B) Query

C) Table

D) Report

Answer**: B) Query

Which of the following is found under the "Home" tab in MS Access?**

A) Relationships

B) Design View

C) Copy and Paste

D) Macros

Answer**: C) Copy and Paste

In the "Home" tab of MS Access, which group contains options like "Cut," "Copy," and "Paste"?**

A) Clipboard

B) Sort & Filter

C) Records

D) Text Formatting

Answer**: A) Clipboard

The "Sort Ascending" and "Sort Descending" options in the Home tab are part of which group?**

A) Find

B) Sort & Filter

C) Clipboard

D) Text Formatting

Answer**: B) Sort & Filter

Which command under the "Home" tab helps to find specific data within a table or query?**

A) Filter

B) Find

C) Paste

D) AutoFormat

Answer**: B) Find

In the "Home" tab of MS Access, which group contains the "New," "Save," and "Delete" options for records?**

A) Views

B) Clipboard

C) Records

D) Font

Answer**: C) Records

Which of the following actions can be performed from the "Home" tab in MS Access?**

A) Apply a filter to data

B) Create a new report

C) Build a query

D) Set up a relationship between tables

Answer**: A) Apply a filter to data

In the "Home" tab, the "View" button allows you to switch between which two views?**

A) Table Design View and Form View

B) Datasheet View and Design View

C) Report View and Print Preview

D) Layout View and SQL View

Super Coaching Odisha By Testbook
SHAKTI SIR

Answer**: B) Datasheet View and Design View

What does the "Refresh All" button in the Home tab do?**

A) Clears all filters applied

B) Reloads the latest data from the database

C) Deletes all records

D) Sorts all records in ascending order

Answer**: B) Reloads the latest data from the database

Which option under the "Home" tab allows you to filter records based on criteria?**

A) View

B) Sort Ascending

C) Filter by Form

D) Macro

Answer**: C) Filter by Form

Which object can be created using the "Table" group under the "Create" tab in MS Access?**

A) Query

B) Form

C) Table

D) Report

Answer**: C) Table

Which of the following options under the "Create" tab allows you to quickly build a form based on a selected table or query?**

A) Query Design

B) Report Wizard

C) Form Wizard

D) Form

Answer**: D) Form

In the "Create" tab, which tool allows you to design a new query from scratch using a graphical interface?**

A) Query Wizard

B) Query Design

C) Simple Query

D) SQL View

Answer**: B) Query Design

Which of the following objects can be created using the "Reports" group under the "Create" tab?**

A) Table

B) Form

C) Macro

D) Report

Answer**: D) Report

If you want to create a new table from an existing Excel file, which option under the "Create" tab will help you import the file?**

A) Form Wizard

B) Report Design

C) Table Design

D) External Data

Answer**: D) External Data

The "Application Parts" option under the "Create" tab is used for:**

A) Creating relationships between tables

B) Adding predefined templates or parts to a database

C) Running macros

D) Importing data

Answer**: B) Adding predefined templates or parts to a database

What type of form can be created using the "Multiple Items" option in the "Forms" group under the "Create" tab?**

A) A form displaying only one record at a time

B) A form that allows editing of multiple records simultaneously

C) A form to create relationships

D) A form to generate reports

Answer**: B) A form that allows editing of multiple records simultaneously

In the "Create" tab, which tool would you use to build a report that provides a detailed view of data, with control over layout and design?**

A) Form Wizard

B) Report Design

C) Report Wizard

D) Table

Answer**: B) Report Design

Which of the following can be created using the "Macros & Code" group under the "Create" tab?**

A) Macros

B) Tables

C) Queries

D) Reports

Answer**: A) Macros

What does the "Blank Form" option under the "Forms" group in the "Create" tab do?**

A) Opens a template form

B) Automatically generates a form with fields

C) Creates a new, empty form that can be customized

D) Imports a form from another database

Answer**: C) Creates a new, empty form that can be customized

Which of the following can be imported using the "Import & Link" group under the "External Data" tab?**

A) Word Document

B) Excel Workbook

C) PDF File

D) PowerPoint Presentation

Answer**: B) Excel Workbook

In the "External Data" tab, which option allows you to link to data stored in another database?**

A) Import Data

B) Export Data

C) Link Data

D) Save Data

Answer**: C) Link Data

Which of the following file formats can be directly exported from MS Access using the "External Data" tab?**

A) .mp3

B) .xml

C) .jpeg

D) .txt

Answer**: B) .xml

If you want to save your query results as an Excel file, which option under the "External Data" tab would you use?**

A) Export to Word

B) Export to Excel

C) Import from Excel

D) Collect Data

Answer**: B) Export to Excel

Which of the following options under the "Database Tools" tab allows you to create a relationship between two tables?**

A) Query Design

B) Relationships

C) Table Design

D) Form Design

Answer**: B) Relationships

In the "Database Tools" tab, which tool allows you to analyze and improve database performance?**

A) Compact & Repair

B) Analyze Table

C) Performance Analyzer

D) Object Dependencies

Answer**: C) Performance Analyzer

What does the "Compact & Repair Database" option under the "Database Tools" tab do?**

A) Backs up the database

B) Shrinks the size of the database and fixes corruption issues

C) Splits the database into two parts

D) Encrypts the database

Answer**: B) Shrinks the size of the database and fixes corruption issues

Which tool under the "Database Tools" tab would you use to set a password to protect your database?**

A) Compact & Repair

B) Encrypt with Password

C) Linked Table Manager

D) Relationships

Answer**: B) Encrypt with Password

Which feature under the "Database Tools" tab can you use to run automated tasks or commands in your database?**

A) Performance Analyzer

B) Relationships

C) Macro

D) Linked Table Manager

Answer**: C) Macro

A crosstab query is a way to group and summarize data in a grid format, making it easier to read and understand:

How it works

A crosstab query groups data into categories based on values from multiple fields in a database. It then calculates a sum, average, or other aggregate function for the groups and displays the results in a grid.

What it's used for

Crosstab queries can be used to check how often people respond to a topic, compare what different groups say about a theme, and more.

How to create one

In Microsoft Access, you can create a crosstab query by clicking Create, then Query Wizard, and then double-clicking Crosstab Query Wizard.
